

2014 South Dakota State University Combined Research and Extension Plan of Work

Status: Accepted

Date Accepted: 06/05/2013

I. Plan Overview

1. Brief Summary about Plan Of Work

Great things are happening in the College of Agricultural and Biological Sciences at South Dakota State University. And it's all because there are great partnerships, old and new, getting stronger every day. It starts with the South Dakota Agricultural Experiment Station and SDSU Extension, with research, teaching and outreach making life better for all South Dakotans. Our partnerships with government entities, commodity organizations, 4-H, and private industry all contribute enormously to creating opportunity and to better serve the people of our state. SDSU's College of Agricultural and Biological Sciences and the College of Education and Human Sciences are working closer than ever to provide important programs in food science and research.

SDSU Extension and the South Dakota Agricultural Experiment Station is taking on the challenge of feeding 2.5 billion people by 2050 with researchers and state specialists located on the SDSU campus in Eastern South Dakota, eight regional centers operating across the state with field specialists, and five research field stations. Outreach is also achieved with three Federally Recognized Tribal Extension Program offices, and the West River Agricultural Center representing the Western part of South Dakota. 4-H Youth Development begins on campus with the South Dakota State 4-H Office and has 4-H field specialists in the regional centers and 4-H youth advisors in county owned offices. Additionally, iGrow is SDSU Extension's teaching platform to deliver valuable information to our online community.

Beginning with this reporting period, an effort is underway to further engage the research projects supported by Hatch funding. Typically, the technical language that researchers use in their reports makes it quite difficult to express their objectives, which inherently leaves them underrepresented in a combined Research and Extension report. The goal for this year is to present a broad, simple summary of the Hatch research activities and to identify how they fit into our Planned Programs. Our endeavor is to share with everyone the valuable research that our scientists are conducting with the use of Hatch funding.

Since the five NIFA Priority Areas are no longer required Planned Programs, we are taking this opportunity to align our Planned Programs with the restructuring of SDSU Extension. During the last year our programs have undergone sweeping changes that will better serve our citizens. As such, this is a very favorable time for a transformation of the data we report and present to the public. The following is a summary of our new Planned Programs, which are based on the USDA Knowledge Area Classification System.

Natural Resources and Environment

Activities in this Planned Program are driven by research and education. The research activities in this program are primarily supported by our Department of Natural Resource Management. Projects funded by Hatch include but are not limited to research studies in carbon sequestration, ecosystems, wildlife habitat, climate change, soil productivity, water quality, bioenergy, and pollution prevention. Activities being reported for SDSU Extension in this Planned Program include Grazing Schools and Concentrated Animal Feeding Operations.

Plants and Their Systems

Activities in this Planned Program are driven by research and education. The research activities in

this program are primarily supported by our Department of Plant Science and our Department of Biology and Microbiology. Hatch funded projects include but are not limited to research involving disease management, wheat genetics and genomics, gene mapping for soybeans, drought tolerant seeds, wine grape cultivars, oat variety development, and sunflower germplasms. Activities being reported for SDSU Extension in this Planned Program include Pesticide Applicator Training and extending the growing season with High Tunnels.

Animals and Their Systems

Activities in this Planned Program are driven equally by research, education and SDSU Extension. The research activities in this program are primarily supported by our Department of Animal Science, Department of Dairy Science and our Veterinary and Biomedical Sciences. Hatch funded projects include but are not limited to research involving reproductive performance in animals, nutrient utilization in dairy cattle diets, diagnosis of viral diseases in swine, Bovine Respiratory Disease in cattle, and improved profitability in sheep and cattle. Activities being reported for SDSU Extension in this Planned Program include beefSD, Calf Value Discovery, and sheepSD.

Agricultural, Natural Resource, and Biological Engineering

There is little activity by research or SDSU Extension in this Planned Program. The research activities in this program are primarily supported by our Department of Agricultural and Biosystems Engineering. Hatch funded projects are limited to research involving developing a sustainable nonfood/non-feed biomass for biodiesel. Activities being reported for SDSU Extension in this Planned Program include Drainage and Water Management.

Food and Non-Food Products: Development, Processing, Quality, and Delivery

Activities in this Planned Program are driven by research and education. The research activities in this program are primarily supported by our Department of Agricultural and Biosystems Engineering, Department of Dairy Science, and our Department of Biology and Microbiology. Hatch funded projects include but are not limited to research involving milk and whey protein, methods to augment beef flavor and tenderness, the development of oilseed biofuels, processing co-products of corn and soybeans as valuable chemicals, and the advancement of technologies for improving food safety. Activities being reported for SDSU Extension in this Planned Program include Barbeque Bootcamp.

Economics, Markets, and Policy

Activities in this Planned Program are driven equally by research, education and SDSU Extension. The research activities in this program are supported by our Department of Economics. Hatch funded projects include but are not limited to research involving agricultural land market trends, economic impacts on wildlife and crop production from biofuel production, agricultural commodity prices, the enhancement of the value of U.S. beef, and policies regarding agriculture, energy and the environment. Activities being reported for SDSU Extension in this Planned Program include Estate and Transition Planning and Ag CEO.

Human Nutrition, Food Safety, and Human Health and Well-Being

Activities in this Planned Program are driven SDSU Extension. The research activities in this program are supported by our partnership with the College of Education and Human Sciences. Hatch funded projects include but are not limited to research involving nutrition and physical activity education, induction of the death of fat cells - apoptotic, the understanding of nutrient-gene interaction, enhanced beef consumption, determining the impact of dietary components, and assessing factors that influence eating behavior of young adults. Activities being reported for SDSU Extension include Food Safety Certification and Recertification, Home Food Preservation, Food Entrepreneurs, KidQuest, Healthy Aging, Tatanka's Healthy Tales, Senior Resource Fairs, International Bonds, and Smart Choices Grocery Store.

Families, Youth, and Communities

Activities in this Planned Program are driven SDSU Extension, with little activity by research. The research activities in this program are supported by our partnership with the College of Education and Human Sciences. Hatch funded projects include but are not limited to research involving financial literacy and management behavior, physical and mental health in diverse rural low-income families, and psychological and socio-cultural factors that impact the decision to save. Activities being reported for SDSU Extension include The Great American Book Read, Small Business Beginnings, FCCLA Leadership, Strong Bodies, Strong Futures, Teens as Teachers, Lakota Beginning Farmer and Rancher Development, Character Counts, and Garden Development or Enhancement.

Estimated Number of Professional FTEs/SYs total in the State.

Year	Extension		Research	
	1862	1890	1862	1890
2014	70.0	0.0	192.6	0.0
2015	70.0	0.0	192.6	0.0
2016	70.0	0.0	192.6	0.0
2017	70.0	0.0	192.6	0.0
2018	70.0	0.0	192.6	0.0

II. Merit Review Process

1. The Merit Review Process that will be Employed during the 5-Year POW Cycle

- Internal University Panel
- External Non-University Panel
- Expert Peer Review

2. Brief Explanation

All Hatch projects are subjected to peer review prior to implementation and require independent peer reviews from two scientists. The department head or a departmental executive committee identifies peer reviewers. The department head and the AES Director serve as merit reviewers. Reviewers are required to comment on why the proposed research is needed, it's relevance to agriculture, the target audience, and how it compliments other research. Proposals for research grants that are funded by stakeholder groups are subjected to review by the stakeholders themselves and by college administrators. SDSU Extension administrators serve as the merit review team for the plan of work. Department heads and program directors conduct peer reviews of programs.

III. Evaluation of Multis & Joint Activities

1. How will the planned programs address the critical issues of strategic importance, including those identified by the stakeholders?

The Planned Programs are based on input from traditional and non-traditional stakeholder groups who identified critical issues. For the purposes of program planning, South Dakota also considers the input of internal stakeholders, which includes Extension state specialists, field specialists, and scientists. The resulting Planned Programs address critical needs and opportunities through integrated research and educational programs.

2. How will the planned programs address the needs of under-served and under-represented populations of the State(s)?

Great efforts are made to seek out and include under-served and under-represented populations in the initial planning of research and Extension programs. In some cases, this involves direct contact with under-served and/or under-represented audiences. In other cases, mass media announcements are used to invite all South Dakotans to participate in program planning.

SDSU Extension has added emphasis in Native American programming through several of its signature programs, particularly with the Healthy Foods and Healthy Children program. As noted in the Stakeholder Input section, Native American is one of the capstone areas that is part of our SDSU Extension Advisory Forum. The input from the Forum greatly increases our understanding of challenges facing the Native American communities in South Dakota.

Outreach to our immigrant populations is also important to SDSU Extension. Much of the immigrant population in South Dakota is Hispanic or Latino and is involved in the dairy industry. The demand for alternate languages is moderate but limited, and SDSU Extension provides print and online materials in Spanish as needed.

3. How will the planned programs describe the expected outcomes and impacts?

The Planned Programs address specific outcomes that occur over the 5-year period of this plan. Some Planned Programs may deliver initial outcomes and impacts in the first year, but the overall impact of these programs will be felt beyond the 5-year planning cycle. Each of the South Dakota Planned Programs list specific outcomes that document progress.

4. How will the planned programs result in improved program effectiveness and/or

South Dakota State University has a strong history of actively integrating research, teaching and Extension programs to deliver science-based information to all citizens. Stakeholder input, from SDSU Extension five-year assessment planning data and other sources, is also used by scientists and classroom educators to gain a better understanding of current needs. Joint FTE appointments give individuals the opportunity to work in a combination of research, Extension and teaching functions, allowing the further integration and transfer of information within the system.

IV. Stakeholder Input

1. Actions taken to seek stakeholder input that encourages their participation

- Use of media to announce public meetings and listening sessions
- Targeted invitation to traditional stakeholder groups
- Targeted invitation to non-traditional stakeholder groups
- Targeted invitation to traditional stakeholder individuals
- Targeted invitation to non-traditional stakeholder individuals

- Targeted invitation to selected individuals from general public
- Survey of traditional stakeholder groups
- Survey of traditional stakeholder individuals
- Survey specifically with non-traditional groups
- Survey specifically with non-traditional individuals

Brief explanation.

Stakeholder participation is solicited from many sources and events, including agricultural check-off groups, commodity groups, funding organizations, governmental agencies, elected officials and boards, public events and meetings, news releases, and industry associations. SDSU Extension seeks stakeholder participation through Advisory Forums made up of Capstone Program Advisory Groups that provide discipline specific feedback. The capstone groups are:

- Competitive Livestock Systems
- Competitive Cropping Systems
- Urban/Rural Interface
- Food & Families
- 4-H Youth Development
- Community Development
- Native American

Stakeholders are highly encouraged to participate in and take an active interest SDSU Extension by providing direction, suggestions, and positive ideas. We ask stakeholders to share visionary strategies that meet the SDSU Extension mission, particularly in the capstone area they are representing. Stakeholders are encouraged to provide feedback and ideas for collaboration and partnership, and to help SDSU Extension reach and serve all demographic populations of the state. At the county level, County Commissioners are asked to maintain a county advisory structure that engages the local 4-H Promotion and Expansion Committee in the advisory role. This advisory structure predominantly gives guidance to county funded budgets and local 4-H expansion efforts.

Other Example Sources of Stakeholder Input:

- South Dakota Soybean Research and Promotion Council
- South Dakota Beef Industry Council
- South Dakota Corn Utilization Council
- South Dakota Oilseeds Council
- South Dakota Pork Producers Council
- South Dakota Wheat Commission Council
- South Dakota Department of Education and Cultural Affairs
- Department of Energy
- Environmental Protection Agency
- South Dakota Department of Agriculture
- Office of State Veterinarian
- South Dakota Game, Fish and Parks
- Natural Resources Conservation Service
- Bureau of Indian Affairs
- South Dakota Weed and Pest Commission

2(A). A brief statement of the process that will be used by the recipient institution to identify individuals and groups stakeholders and to collect input from them

1. Method to identify individuals and groups

- Use Advisory Committees
- Open Listening Sessions
- Needs Assessments
- Use Surveys

Brief explanation.

Individuals and groups are identified through networking, attending conferences, public meetings, the internet, programming efforts, field tours, emails, and face-to-face arrangements. The Capstone Program Advisory Groups preferably consists of 8-12 individuals that are representative of the demographic composition of South Dakota in regards to race, ethnicity, gender, and age. SDSU Extension strives for balance in the groups by reaching out to private citizens, public agencies, discipline related industries, non-profit organizations and civic groups.

2(B). A brief statement of the process that will be used by the recipient institution to identify individuals and groups who are stakeholders and to collect input from them

1. Methods for collecting Stakeholder Input

- Meeting with traditional Stakeholder groups
- Survey of traditional Stakeholder groups
- Meeting with the general public (open meeting advertised to all)
- Survey specifically with non-traditional groups

Brief explanation.

The SDSU Extension Advisory Forum is held once a year. During the course of the annual advisory forum, all capstone program advisory groups will be convened on the same date and in the same location. All capstone program advisory group members will meet together for a brief period of time to receive information regarding SDSU Extension. Specific capstone program advisory groups will then meet to discuss issues/concerns relative to the discipline. SDSU Extension writes summaries of the discussions held by each capstone program advisory group during the Forum. South Dakota State 4-H meets with the Leader's Association and County Commissioners to receive input for 4-H promotion and expansion.

3. A statement of how the input will be considered

- In the Budget Process
- To Identify Emerging Issues
- Redirect Extension Programs
- Redirect Research Programs
- In the Staff Hiring Process

- In the Action Plans
- To Set Priorities

Brief explanation.

Administrators evaluate all input, requests and comments from stakeholders. SDSU Extension writes summaries of the discussions held by each capstone program group during the Advisory Forums. Program Directors share the Advisory Forum summaries specific to the capstone program area with department heads, faculty and specialists during program planning meetings. Stakeholder input is reviewed, considered and used as a basis to create SDSU Extension programs and AES research projects.

Stakeholder input is very important to the Agricultural Experiment Station and to SDSU Extension. By soliciting input, we learn what the challenges are that they are facing and what they would like to see us do to address their challenges. We also learn what they believe the future of South Dakota looks like, what they see as opportunities, and what they think we can do to support those opportunities.

V. Planned Program Table of Content

S. No.	PROGRAM NAME
1	Natural Resources and Environment
2	Plants and Their Systems
3	Animals and Their Systems
4	Agricultural, Natural Resource, and Biological Engineering
5	Food and Non-Food Products: Development, Processing, Quality, and Delivery
6	Economics, Markets, and Policy
7	Human Nutrition, Food Safety, and Human Health and Well-Being
8	Families, Youth and Communities

V(A). Planned Program (Summary)

Program # 1

1. Name of the Planned Program

Natural Resources and Environment

2. Brief summary about Planned Program

Activities in this Planned Program are driven by research and education. The research activities in this program are primarily supported by our Department of Natural Resource Management. Projects funded by Hatch include but are not limited to research studies in carbon sequestration, ecosystems, wildlife habitat, climate change, soil productivity, water quality, bioenergy, and pollution prevention. Activities being reported for SDSU Extension in this Planned Program include Grazing Schools and Concentrated Animal Feeding Operations.

3. Program existence : Intermediate (One to five years)

4. Program duration : Medium Term (One to five years)

5. Expending formula funds or state-matching funds : Yes

6. Expending other than formula funds or state-matching funds : Yes

V(B). Program Knowledge Area(s)

1. Program Knowledge Areas and Percentage

KA Code	Knowledge Area	%1862 Extension	%1890 Extension	%1862 Research	%1890 Research
101	Appraisal of Soil Resources	5%		5%	
102	Soil, Plant, Water, Nutrient Relationships	15%		16%	
104	Protect Soil from Harmful Effects of Natural Elements	0%		3%	
111	Conservation and Efficient Use of Water	0%		7%	
112	Watershed Protection and Management	0%		5%	
121	Management of Range Resources	35%		13%	
122	Management and Control of Forest and Range Fires	0%		1%	
131	Alternative Uses of Land	0%		4%	
132	Weather and Climate	0%		3%	
133	Pollution Prevention and Mitigation	45%		3%	
134	Outdoor Recreation	0%		5%	
135	Aquatic and Terrestrial Wildlife	0%		22%	
136	Conservation of Biological Diversity	0%		11%	
141	Air Resource Protection and Management	0%		2%	
	Total	100%		100%	

V(C). Planned Program (Situation and Scope)**1. Situation and priorities**

South Dakota has a wide diversity of natural resources that depend on maintenance and good stewardship of the land. Too much grazing, urban sprawl, the creation of reservoirs, plant invasion, feedlot runoff, global warming, as well as the growing world economy all contribute to the degradation of our natural resources. The mismanagement of natural resources can cause many problems that affect the sustainability of grasslands. Without proper maintenance of this resource, the livelihood of ranchers is at risk.

2. Scope of the Program

- In-State Extension
- In-State Research
- Multistate Research
- Multistate Extension

- Integrated Research and Extension
- Multistate Integrated Research and Extension

V(D). Planned Program (Assumptions and Goals)

1. Assumptions made for the Program

We Assume:

- There is an economic benefit to preserving our natural resources
- Global warming is linked to increased levels of carbon dioxide in the atmosphere
- The Conservation Reserve Program provides habitat for wildlife populations
- Bacteria play a crucial role in soil fertility
- Climate changes impact agriculture
- Agricultural production can contaminate soil, air, and water resources
- Perennial grasses are prime candidates for cellulosic ethanol production
- Vegetative treatment systems are designed to prevent feedlot runoff
- Invasive plant species alter ecosystem processes
- Wind farms have the potential to result in adverse environmental impacts
- Proper grassland management increases the sustainability of grasslands

2. Ultimate goal(s) of this Program

Goals:

- Protect and provide habitat for wildlife and sport fisheries
- Maintain or increase the soil organic carbon levels
- Contribute to the understanding of soil fertility
- Provide revised nutrient recommendations for corn and wheat
- Enable producers to make better environmental choices
- Protect water quality
- Increase renewable energy
- Reduce soil degradation
- Improve profitability for farmers growing bioenergy feed stocks
- Provide outreach for the management of pesticides and contaminants

V(E). Planned Program (Inputs)

1. Estimated Number of professional FTE/SYs to be budgeted for this Program

Year	Extension		Research	
	1862	1890	1862	1890
2014	2.7	0.0	52.8	0.0
2015	2.7	0.0	52.8	0.0
2016	2.7	0.0	52.8	0.0
2017	2.7	0.0	52.8	0.0
2018	2.7	0.0	52.8	0.0

V(F). Planned Program (Activity)

1. Activity for the Program

- Conduct Field and Lab Research
- Collaborate with SDSU Extension
- Collaborate with Other States
- Partner with South Dakota Game, Fish and Parks
- Partner with the South Dakota Grassland Coalition
- Partner with Business Organizations
- Collaborate with Non-profit Organizations
- Participate with the South Dakota State Climate Office
- Participate with the United States Army Corps of Engineers
- Conduct Training for Concentrated Animal Feeding Operations
- Partner with the South Dakota Department of Environmental and Natural Resources
- Partner with the Natural Resources Conservation Service

2. Type(s) of methods to be used to reach direct and indirect contacts

Extension

Direct Methods	Indirect Methods
<ul style="list-style-type: none"> • Education Class • Workshop • Demonstrations 	<ul style="list-style-type: none"> • Newsletters • Web sites other than eXtension • Other 1 (social media)

3. Description of targeted audience

- Wildlife and Fisheries Managers
- Scientists
- Environmentalists
- Outdoor Enthusiasts
- Farmers, Ranchers and Producers
- General Public
- Operators of Concentrated Animal Feeding Operations

V(G). Planned Program (Outputs)

NIFA no longer requires you to report target numbers for standard output measures in the Plan of Work. However, all institutions will report actual numbers for standard output measures in the Annual Report of Accomplishments and Results. The standard outputs for which you must continue to collect data are:

- Number of contacts
 - Direct Adult Contacts
 - Indirect Adult Contacts
 - Direct Youth Contacts
 - Indirect Youth Contact
- Number of patents submitted
- Number of peer reviewed publications

Clicking this box affirms you will continue to collect data on these items and report the data in the Annual Report of Accomplishments and Results.

V(H). State Defined Outputs

1. Output Measure

- Percentage of all Hatch Research Projects in Natural Resources and Environment
- Increase Rancher's Knowledge of Grazing Techniques and Grassland Management
- Number of CAFOs Participants

Clicking this box affirms you will continue to collect data on these items and report the data in the Annual Report of Accomplishments and Results.

V(I). State Defined Outcome

O. No	Outcome Name
1	Number of Natural Resources and Environment Hatch Research Projects
2	Number of Grazing School Participants
3	Number of CAFOs Training Sessions

Outcome # 1

1. Outcome Target

Number of Natural Resources and Environment Hatch Research Projects

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 101 - Appraisal of Soil Resources
- 102 - Soil, Plant, Water, Nutrient Relationships
- 104 - Protect Soil from Harmful Effects of Natural Elements
- 111 - Conservation and Efficient Use of Water
- 112 - Watershed Protection and Management
- 121 - Management of Range Resources
- 122 - Management and Control of Forest and Range Fires
- 131 - Alternative Uses of Land
- 132 - Weather and Climate
- 133 - Pollution Prevention and Mitigation
- 134 - Outdoor Recreation
- 135 - Aquatic and Terrestrial Wildlife
- 136 - Conservation of Biological Diversity
- 141 - Air Resource Protection and Management

4. Associated Institute Type(s)

- 1862 Research

Outcome # 2

1. Outcome Target

Number of Grazing School Participants

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 101 - Appraisal of Soil Resources
- 102 - Soil, Plant, Water, Nutrient Relationships
- 121 - Management of Range Resources

4. Associated Institute Type(s)

- 1862 Extension

Outcome # 3

1. Outcome Target

Number of CAFOs Training Sessions

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 133 - Pollution Prevention and Mitigation

4. Associated Institute Type(s)

- 1862 Extension

V(J). Planned Program (External Factors)

1. External Factors which may affect Outcomes

- Natural Disasters (drought, weather extremes, etc.)
- Economy

Description

Drought issues are predicted to continue into the growing season of 2013.

Funding cuts are expected to continue to impact South Dakota State University, especially filling vacant staff positions in SDSU Extension.

V(K). Planned Program - Planned Evaluation Studies

Description of Planned Evaluation Studies

Due to continued budget constraints, a full-time evaluator has not been hired. However, we are diligent in our efforts to teach staff how to collect and report meaningful, useful programming data. This includes establishing baseline data, templates that correspond to NIFA reporting, and writing impacts that show strong results.

V(A). Planned Program (Summary)

Program # 2

1. Name of the Planned Program

Plants and Their Systems

2. Brief summary about Planned Program

Activities in this Planned Program are driven by research and education. The research activities in this program are primarily supported by our Department of Plant Science and our Department of Biology and Microbiology. Hatch funded projects include but are not limited to research involving disease management, wheat genetics and genomics, gene mapping for soybeans, drought tolerant seeds, wine grape cultivars, oat variety development, and sunflower germplasms. Activities being reported for SDSU Extension in this Planned Program include Pesticide Applicator Training and extending the growing season with High Tunnels.

3. Program existence : Intermediate (One to five years)

4. Program duration : Medium Term (One to five years)

5. Expending formula funds or state-matching funds : Yes

6. Expending other than formula funds or state-matching funds : Yes

V(B). Program Knowledge Area(s)

1. Program Knowledge Areas and Percentage

KA Code	Knowledge Area	%1862 Extension	%1890 Extension	%1862 Research	%1890 Research
201	Plant Genome, Genetics, and Genetic Mechanisms	0%		20%	
202	Plant Genetic Resources	0%		14%	
203	Plant Biological Efficiency and Abiotic Stresses Affecting Plants	0%		24%	
204	Plant Product Quality and Utility (Preharvest)	30%		6%	
205	Plant Management Systems	0%		11%	
206	Basic Plant Biology	0%		2%	
211	Insects, Mites, and Other Arthropods Affecting Plants	70%		8%	
212	Pathogens and Nematodes Affecting Plants	0%		9%	
213	Weeds Affecting Plants	0%		1%	
215	Biological Control of Pests Affecting Plants	0%		3%	
216	Integrated Pest Management Systems	0%		2%	
	Total	100%		100%	

V(C). Planned Program (Situation and Scope)**1. Situation and priorities**

Crop diseases, insect pests, drought, changing climatic conditions, soil erosion, and fewer acres of land available for farming are all serious production constraints for all crops produced in South Dakota.

Producers planning to apply any pesticide to a commodity worth \$1,000 or more must be certified as a private applicator. Anyone that applies pesticides for hire must be certified and licensed as a commercial applicator.

South Dakotans are not eating enough fruits and vegetables. In a 2009 CDC report, South Dakota was ranked lowest in the nation of consumption of fruits and vegetables. The production of abundant fruits and vegetables is needed to improve the health of consumers. The use of high tunnels help growers increase their yields by extending the growing season.

2. Scope of the Program

- In-State Extension
- In-State Research
- Multistate Research

- Multistate Extension
- Integrated Research and Extension
- Multistate Integrated Research and Extension

V(D). Planned Program (Assumptions and Goals)

1. Assumptions made for the Program

We Assume:

- Plants face biological challenges when confronted by environmental stresses
- Genetically adapted cultivars are needed to provide bioenergy production
- New and re-emerging disease problems may become economically damaging
- There is a potential of new or underutilized oilseed crops
- Plant viruses cause yield and quality losses in agricultural commodities
- Grain production must increase at an annual rate of 2% to meet human needs by 2050
- Cover crops provide for improved soil quality and sustainable crop production
- The consumption of fruits and vegetables needs to increase in South Dakota
- Producers will use pesticides

2. Ultimate goal(s) of this Program

Goals:

- New and Improved plant varieties
- Increased agriculture production
- Eradicate plant diseases
- Develop drought resistant wheat
- Reduce economic impacts of fungal diseases on corn and soybeans
- Increase yield potential of spring wheat cultivars
- Provide advice to growers for maximizing seed yield, oil content, and crop quality
- Complete the analysis and mapping of genes for resistance to the soybean aphid
- Improve the sustainability of wheat production for food and biofuels
- Increase the production of locally grown fruits and vegetables
- Provide safe practices for pesticide application

V(E). Planned Program (Inputs)

1. Estimated Number of professional FTE/SYs to be budgeted for this Program

Year	Extension		Research	
	1862	1890	1862	1890
2014	8.1	0.0	64.2	0.0
2015	8.1	0.0	64.2	0.0
2016	8.1	0.0	64.2	0.0
2017	8.1	0.0	64.2	0.0

Year	Extension		Research	
	1862	1890	1862	1890
2018	8.1	0.0	64.2	0.0

V(F). Planned Program (Activity)

1. Activity for the Program

- Develop Improved Wheat Cultivars
- Conduct Research on Economic Impacts of Fungal Diseases
- Develop Superior Sunflower Germplasm
- Develop New Cultivars of Prairie Cordgrass for Bioenergy Production
- Analyze and Map Genes for Soybean Resistance of Aphids
- Develop New Multi-Purpose Oat Varieties
- Conduct Pesticide Applicator Training Sessions
- Conduct High Tunnel Workshops

2. Type(s) of methods to be used to reach direct and indirect contacts

Extension

Direct Methods	Indirect Methods
<ul style="list-style-type: none"> • Education Class • Workshop • One-on-One Intervention • Demonstrations 	<ul style="list-style-type: none"> • Newsletters • Web sites other than eXtension

3. Description of targeted audience

- Research Community
- Soybean Growers
- Wheat Growers
- Corn Growers
- Biofuels Crop Industry
- Producers
- Graduate Students
- Private and Commercial Pesticide Applicators
- Specialty Crop Growers

V(G). Planned Program (Outputs)

NIFA no longer requires you to report target numbers for standard output measures in the Plan of Work. However, all institutions will report actual numbers for standard output measures in the Annual Report of Accomplishments and Results. The standard outputs for which you must continue to collect data are:

- Number of contacts
 - Direct Adult Contacts
 - Indirect Adult Contacts
 - Direct Youth Contacts
 - Indirect Youth Contact
- Number of patents submitted
- Number of peer reviewed publications

Clicking this box affirms you will continue to collect data on these items and report the data in the Annual Report of Accomplishments and Results.

V(H). State Defined Outputs

1. Output Measure

- Percentage of all Hatch Research Projects in Plants and Their Systems
- Number of Pesticide Applicator Training Sessions
- Number of High Tunnel Workshops Conducted

Clicking this box affirms you will continue to collect data on these items and report the data in the Annual Report of Accomplishments and Results.

V(I). State Defined Outcome

O. No	Outcome Name
1	Number of Plants and Their Systems Hatch Research Projects
2	Number of Pesticide Applicator Training Participants
3	Number High Tunnel Workshop Participants

Outcome # 1

1. Outcome Target

Number of Plants and Their Systems Hatch Research Projects

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 201 - Plant Genome, Genetics, and Genetic Mechanisms
- 202 - Plant Genetic Resources
- 203 - Plant Biological Efficiency and Abiotic Stresses Affecting Plants
- 204 - Plant Product Quality and Utility (Preharvest)
- 205 - Plant Management Systems
- 206 - Basic Plant Biology
- 211 - Insects, Mites, and Other Arthropods Affecting Plants
- 212 - Pathogens and Nematodes Affecting Plants
- 213 - Weeds Affecting Plants
- 215 - Biological Control of Pests Affecting Plants
- 216 - Integrated Pest Management Systems

4. Associated Institute Type(s)

- 1862 Research

Outcome # 2

1. Outcome Target

Number of Pesticide Applicator Training Participants

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 211 - Insects, Mites, and Other Arthropods Affecting Plants

4. Associated Institute Type(s)

- 1862 Extension

Outcome # 3

1. Outcome Target

Number High Tunnel Workshop Participants

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 204 - Plant Product Quality and Utility (Preharvest)

4. Associated Institute Type(s)

- 1862 Extension

V(J). Planned Program (External Factors)

1. External Factors which may affect Outcomes

- Natural Disasters (drought, weather extremes, etc.)
- Economy

Description

Drought issues are predicted to continue into the growing season of 2013.

Funding cuts are expected to continue to impact South Dakota State University, especially filling vacant staff positions in SDSU Extension.

V(K). Planned Program - Planned Evaluation Studies

Description of Planned Evaluation Studies

Due to continued budget constraints, a full-time evaluator has not been hired. However, we are diligent in our efforts to teach staff how to collect and report meaningful, useful programming data. This includes establishing baseline data, templates that correspond to NIFA reporting, and writing impacts that show strong results.

High Tunnel Production

This is a new program and in progress, showing only short term impacts currently.

V(A). Planned Program (Summary)

Program # 3

1. Name of the Planned Program

Animals and Their Systems

2. Brief summary about Planned Program

Activities in this Planned Program are driven equally by research, education and SDSU Extension. The research activities in this program are primarily supported by our Department of Animal Science, Department of Dairy Science and our Veterinary and Biomedical Sciences. Hatch funded projects include but are not limited to research involving reproductive performance in animals, nutrient utilization in dairy cattle diets, diagnosis of viral diseases in swine, Bovine Respiratory Disease in cattle, and improved profitability in sheep and cattle. Activities being reported for SDSU Extension in this Planned Program include beefSD, Calf Value Discovery, and sheepSD.

3. Program existence : Intermediate (One to five years)

4. Program duration : Medium Term (One to five years)

5. Expending formula funds or state-matching funds : Yes

6. Expending other than formula funds or state-matching funds : Yes

V(B). Program Knowledge Area(s)

1. Program Knowledge Areas and Percentage

KA Code	Knowledge Area	%1862 Extension	%1890 Extension	%1862 Research	%1890 Research
301	Reproductive Performance of Animals	0%		12%	
302	Nutrient Utilization in Animals	0%		25%	
303	Genetic Improvement of Animals	0%		1%	
304	Animal Genome	0%		5%	
305	Animal Physiological Processes	0%		4%	
306	Environmental Stress in Animals	0%		1%	
307	Animal Management Systems	60%		11%	
308	Improved Animal Products (Before Harvest)	15%		4%	
311	Animal Diseases	0%		29%	
313	Internal Parasites in Animals	0%		3%	
314	Toxic Chemicals, Poisonous Plants, Naturally Occurring Toxins, and Other Hazards Affecting Animals	0%		3%	
315	Animal Welfare/Well-Being and Protection	25%		2%	
	Total	100%		100%	

V(C). Planned Program (Situation and Scope)**1. Situation and priorities**

Production costs are the determining factor in livestock producer profitability. High feed costs, poor reproductive performance, and disease are primary concerns for producers and scientists.

Sheep and lamb inventory in the United States has been declining over the last few decades. Producers need to grow their flocks to meet the demands of lamb meat and wool, and at the same time keep their operations sustainable.

The success of a cow-calf operation can come down to the marketing strategy employed by the producer. Retained ownership is a program that allows producers the opportunity to start with as few as five of their own calves and pool them with other calves to see how they perform in a feedlot. Retained ownership can provide the greatest opportunity to realize the true value of cattle, but it can also have increased economic risks.

2. Scope of the Program

- In-State Extension

- In-State Research
- Multistate Research
- Multistate Extension
- Integrated Research and Extension
- Multistate Integrated Research and Extension

V(D). Planned Program (Assumptions and Goals)

1. Assumptions made for the Program

We Assume:

- Biofuel industry co-products can be used by the livestock industry
- The administration of estrogen will increase reproductive efficiency in swine
- Volatile cattle prices and environmental issues limit producer sustainability
- There is an economic advantage to having calves born early in the calving season
- Infectious diseases present economic and animal welfare concerns to the swine industry
- Lamb inventory in the United States has been declining for several decades

2. Ultimate goal(s) of this Program

Goals:

- Improve efficiency to produce milk
- Increase reproductive performance in swine
- Reduce costs and increase profits for cattle ranchers
- Increase pregnancy rates in cows
- Improve the quality, speed and affordability of diagnosing viral diseases in swine
- Increase the production of lamb meat and wool

V(E). Planned Program (Inputs)

1. Estimated Number of professional FTE/SYs to be budgeted for this Program

Year	Extension		Research	
	1862	1890	1862	1890
2014	11.0	0.0	30.7	0.0
2015	11.0	0.0	30.7	0.0
2016	11.0	0.0	30.7	0.0
2017	11.0	0.0	30.7	0.0
2018	11.0	0.0	30.7	0.0

V(F). Planned Program (Activity)

1. Activity for the Program

- Develop Vaccine Technologies
- Research Methodologies to Increase Reproductive Performance in Animals
- Conduct Research that Leads to Muscle Growth Augmentation
- Determine the Effects of Co-product Based Lamb Finishing Diets
- Develop sheepSD Program
- Coordinate Value-Based Marketing System for Cow-calf Operations
- Develop beefSD
- Conduct Ranch Visits

2. Type(s) of methods to be used to reach direct and indirect contacts

Extension

Direct Methods	Indirect Methods
<ul style="list-style-type: none"> • Education Class • Workshop • Group Discussion • One-on-One Intervention • Demonstrations 	<ul style="list-style-type: none"> • Newsletters • Web sites other than eXtension

3. Description of targeted audience

- Veterinarians
- Dairy Producers
- Producers of Ethanol Co-products
- Cattle Producers
- Swine Producers
- Muscle Biologists
- Livestock Nutritionists
- Sheep Industry
- Cow-calf Producers

V(G). Planned Program (Outputs)

NIFA no longer requires you to report target numbers for standard output measures in the Plan of Work. However, all institutions will report actual numbers for standard output measures in the Annual Report of Accomplishments and Results. The standard outputs for which you must continue to collect data are:

- Number of contacts
 - Direct Adult Contacts
 - Indirect Adult Contacts
 - Direct Youth Contacts
 - Indirect Youth Contact
- Number of patents submitted
- Number of peer reviewed publications

Clicking this box affirms you will continue to collect data on these items and report the data in the Annual Report of Accomplishments and Results.

V(H). State Defined Outputs

1. Output Measure

- Percentage of all Hatch Research Projects in Animals and Their Systems
- Launch sheepSD as a Learning Opportunity for Sheep Producers
- Demonstrate Value-Based Marketing to Cow-calf Producers
- Provide Management Tools to Beginning Cattle Ranchers

Clicking this box affirms you will continue to collect data on these items and report the data in the Annual Report of Accomplishments and Results.

V(I). State Defined Outcome

O. No	Outcome Name
1	Number of Animals and Their Systems Hatch Research Projects
2	Number of Sheep Operations Participating in sheepSD
3	Number of Cow-calf Operations Participating in the Calf Value Discovery Program
4	Number of beefSD Participants

Outcome # 1

1. Outcome Target

Number of Animals and Their Systems Hatch Research Projects

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 301 - Reproductive Performance of Animals
- 302 - Nutrient Utilization in Animals
- 303 - Genetic Improvement of Animals
- 304 - Animal Genome
- 305 - Animal Physiological Processes
- 306 - Environmental Stress in Animals
- 307 - Animal Management Systems
- 308 - Improved Animal Products (Before Harvest)
- 311 - Animal Diseases
- 313 - Internal Parasites in Animals
- 314 - Toxic Chemicals, Poisonous Plants, Naturally Occurring Toxins, and Other Hazards Affecting Animals
- 315 - Animal Welfare/Well-Being and Protection

4. Associated Institute Type(s)

- 1862 Research

Outcome # 2

1. Outcome Target

Number of Sheep Operations Participating in sheepSD

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 307 - Animal Management Systems
- 308 - Improved Animal Products (Before Harvest)
- 315 - Animal Welfare/Well-Being and Protection

4. Associated Institute Type(s)

- 1862 Extension

Outcome # 3

1. Outcome Target

Number of Cow-calf Operations Participating in the Calf Value Discovery Program

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 307 - Animal Management Systems
- 315 - Animal Welfare/Well-Being and Protection

4. Associated Institute Type(s)

- 1862 Extension

Outcome # 4

1. Outcome Target

Number of beefSD Participants

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 307 - Animal Management Systems
- 315 - Animal Welfare/Well-Being and Protection

4. Associated Institute Type(s)

- 1862 Extension

V(J). Planned Program (External Factors)

1. External Factors which may affect Outcomes

- Natural Disasters (drought, weather extremes, etc.)
- Economy

Description

Drought issues are predicted to continue into the growing season of 2013.

Funding cuts are expected to continue to impact South Dakota State University, especially filling vacant staff positions in SDSU Extension.

V(K). Planned Program - Planned Evaluation Studies

Description of Planned Evaluation Studies

Due to continued budget constraints, a full-time evaluator has not been hired. However, we are diligent in our efforts to teach staff how to collect and report meaningful, useful programming data. This includes establishing baseline data, templates that correspond to NIFA reporting, and writing impacts that show strong results.

V(A). Planned Program (Summary)

Program # 4

1. Name of the Planned Program

Agricultural, Natural Resource, and Biological Engineering

2. Brief summary about Planned Program

There is little activity by research or SDSU Extension in this Planned Program. The research activities in this program are primarily supported by our Department of Agricultural and Biosystems Engineering. Hatch funded projects are limited to research involving developing a sustainable nonfood/non-feed biomass for biodiesel. Activities being reported for SDSU Extension in this Planned Program include Drainage and Water Management.

3. Program existence : Intermediate (One to five years)

4. Program duration : Medium Term (One to five years)

5. Expending formula funds or state-matching funds : Yes

6. Expending other than formula funds or state-matching funds : Yes

V(B). Program Knowledge Area(s)

1. Program Knowledge Areas and Percentage

KA Code	Knowledge Area	%1862 Extension	%1890 Extension	%1862 Research	%1890 Research
401	Structures, Facilities, and General Purpose Farm Supplies	0%		9%	
402	Engineering Systems and Equipment	0%		9%	
403	Waste Disposal, Recycling, and Reuse	0%		61%	
404	Instrumentation and Control Systems	0%		11%	
405	Drainage and Irrigation Systems and Facilities	100%		10%	
	Total	100%		100%	

V(C). Planned Program (Situation and Scope)

1. Situation and priorities

Research in biomass technology is needed to enhance the energy security of the United States.

Land prices, weather patterns, and new technologies are all reasons that there is an increased interest in drainage tiling to help solve moisture problems. Before tiling land that is enrolled in farm programs, a wetland determination needs to be done. There are technical, environmental, and legal concerns that must be considered, and without the proper knowledge, a lot can go wrong.

2. Scope of the Program

- In-State Extension
- In-State Research
- Multistate Research
- Multistate Extension

V(D). Planned Program (Assumptions and Goals)

1. Assumptions made for the Program

We Assume:

- Carbon dioxide from ethanol production can be used to create a new source of biomass
- Weather patterns will continue to create moisture problems for landowners

2. Ultimate goal(s) of this Program

Goals:

- Increase profits of ethanol production while meeting energy demands
- Increase usability of land in a safe, legal, and environmentally friendly manner

V(E). Planned Program (Inputs)

1. Estimated Number of professional FTE/SYs to be budgeted for this Program

Year	Extension		Research	
	1862	1890	1862	1890
2014	3.6	0.0	2.5	0.0
2015	3.6	0.0	2.5	0.0
2016	3.6	0.0	2.5	0.0
2017	3.6	0.0	2.5	0.0
2018	3.6	0.0	2.5	0.0

V(F). Planned Program (Activity)

1. Activity for the Program

- Conduct Research to Create New Sources of Biomass
- Conduct Drainage and Water Management Design Workshops

2. Type(s) of methods to be used to reach direct and indirect contacts

Extension

Direct Methods	Indirect Methods
<ul style="list-style-type: none"> ● Education Class ● Workshop ● Group Discussion ● Demonstrations 	<ul style="list-style-type: none"> ● Newsletters ● Web sites other than eXtension ● Other 1 (social media)

3. Description of targeted audience

- Biofuel Industry
- Scientists
- Farmers
- Landowners
- Drainage Contractors

V(G). Planned Program (Outputs)

NIFA no longer requires you to report target numbers for standard output measures in the Plan of Work. However, all institutions will report actual numbers for standard output measures in the Annual Report of Accomplishments and Results. The standard outputs for which you must continue to collect data are:

- Number of contacts
 - Direct Adult Contacts
 - Indirect Adult Contacts
 - Direct Youth Contacts
 - Indirect Youth Contact
- Number of patents submitted
- Number of peer reviewed publications

Clicking this box affirms you will continue to collect data on these items and report the data in the Annual Report of Accomplishments and Results.

V(H). State Defined Outputs

1. Output Measure

- Percentage of all Hatch Research Projects in Agricultural, Natural Resource, and Biological Engineering
- Number of Drainage and Water Management Design Workshops

- Clicking this box affirms you will continue to collect data on these items and report the data in the Annual Report of Accomplishments and Results.

V(I). State Defined Outcome

O. No	Outcome Name
1	Number of Agricultural, Natural Resource, and Biological Engineering Hatch Research Projects
2	Number of Drainage and Water Management Design Participants

Outcome # 1

1. Outcome Target

Number of Agricultural, Natural Resource, and Biological Engineering Hatch Research Projects

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 401 - Structures, Facilities, and General Purpose Farm Supplies
- 402 - Engineering Systems and Equipment
- 403 - Waste Disposal, Recycling, and Reuse
- 404 - Instrumentation and Control Systems
- 405 - Drainage and Irrigation Systems and Facilities

4. Associated Institute Type(s)

4. Associated Institute Type(s)

- 1862 Extension

V(J). Planned Program (External Factors)

1. External Factors which may affect Outcomes

- Natural Disasters (drought, weather extremes, etc.)
- Economy

Description

Drought issues are predicted to continue into the growing season of 2013.

Funding cuts are expected to continue to impact South Dakota State University, especially filling vacant staff positions in SDSU Extension.

V(K). Planned Program - Planned Evaluation Studies

Description of Planned Evaluation Studies

Due to continued budget constraints, a full-time evaluator has not been hired. However, we are diligent in our efforts to teach staff how to collect and report meaningful, useful programming data. This includes establishing baseline data, templates that correspond to NIFA reporting, and writing impacts that show strong results.

V(A). Planned Program (Summary)

Program # 5

1. Name of the Planned Program

Food and Non-Food Products: Development, Processing, Quality, and Delivery

2. Brief summary about Planned Program

Activities in this Planned Program are driven by research and education. The research activities in this program are primarily supported by our Department of Agricultural and Biosystems Engineering, Department of Dairy Science, and our Department of Biology and Microbiology. Hatch funded projects include but are not limited to research involving milk and whey protein, methods to augment beef flavor and tenderness, the development of oilseed biofuels, processing co-products of corn and soybeans as valuable chemicals, and the advancement of technologies for improving food safety. Activities being reported for SDSU Extension in this Planned Program include Barbeque Bootcamp.

3. Program existence : Intermediate (One to five years)

4. Program duration : Medium Term (One to five years)

5. Expending formula funds or state-matching funds : Yes

6. Expending other than formula funds or state-matching funds : Yes

V(B). Program Knowledge Area(s)

1. Program Knowledge Areas and Percentage

KA Code	Knowledge Area	%1862 Extension	%1890 Extension	%1862 Research	%1890 Research
501	New and Improved Food Processing Technologies	0%		24%	
502	New and Improved Food Products	0%		27%	
503	Quality Maintenance in Storing and Marketing Food Products	0%		3%	
504	Home and Commercial Food Service	80%		0%	
511	New and Improved Non-Food Products and Processes	0%		45%	
512	Quality Maintenance in Storing and Marketing Non-Food Products	0%		1%	
703	Nutrition Education and Behavior	10%		0%	
712	Protect Food from Contamination by Pathogenic Microorganisms, Parasites, and Naturally Occurring Toxins	10%		0%	
	Total	100%		100%	

V(C). Planned Program (Situation and Scope)

1. Situation and priorities

The challenge today of producing enough food, fiber and fuel for more than 9.5 billion people by 2050 is almost daunting, especially because it needs to be done using less land, less water and less energy than is used today. Science driven technologies must be developed for this to be accomplished in a sustainable manner.

In recent years, there has been a lot of negative information surrounding consumer meats. Often times this information is incorrect or misleading, leaving the consumer grasping for answers.

2. Scope of the Program

- In-State Extension
- In-State Research
- Integrated Research and Extension

V(D). Planned Program (Assumptions and Goals)

1. Assumptions made for the Program

We Assume:

- New bioconversion technologies can produce valuable chemicals biomass processing
- The world demand for dairy protein exceeds the world supply of dairy protein
- Biomass can be converted into biofuels through viable conversion technologies
- Grain fed beef in the United States maintains a competitive edge in the marketplace
- The biofuel industry provides opportunities for agricultural diversification
- Consumers are increasingly looking for products with added health benefits
- High pressure pasteurization and ultrasound processing can make food safer and better

2. Ultimate goal(s) of this Program

Goals:

- Increase ethanol industry profit from value-added co-products
- Develop manufacturing processes for protein based dairy ingredients
- Meet the growing demand of transportation fuel
- Increase cattle producer profitability by augmenting beef tenderness
- Develop an oilseed based biofuel industry in the Northern Great Plains of North America
- Increase dairy production by creating products with nutritionally added-value benefits
- Advance technologies for the purpose of improving food safety, quality, and security

V(E). Planned Program (Inputs)

1. Estimated Number of professional FTE/SYs to be budgeted for this Program

Year	Extension		Research	
	1862	1890	1862	1890
2014	2.0	0.0	24.6	0.0
2015	2.0	0.0	24.6	0.0

Year	Extension		Research

V(J). Planned Program (External Factors)

1. External Factors which may affect Outcomes

- Economy

Description

Funding cuts are expected to continue to impact South Dakota State University, especially filling vacant staff positions in SDSU Extension.

V(K). Planned Program - Planned Evaluation Studies

Description of Planned Evaluation Studies

Due to continued budget constraints, a full-time evaluator has not been hired. However, we are diligent in our efforts to teach staff how to collect and report meaningful, useful programming data. This includes establishing baseline data, templates that correspond to NIFA reporting, and writing impacts that show strong results.

V(A). Planned Program (Summary)

Program # 6

1. Name of the Planned Program

Economics, Markets, and Policy

2. Brief summary about Planned Program

Activities in this Planned Program are driven equally by research, education and SDSU Extension. The research activities in this program are supported by our Department of Economics. Hatch funded projects include but are not limited to research involving agricultural land market trends, economic impacts on wildlife and crop production from biofuel production, agricultural commodity prices, the enhancement of the value of U.S. beef, and policies regarding agriculture, energy and the environment. Activities being reported for SDSU Extension in this Planned Program include Estate and Transition Planning and Ag CEO.

3. Program existence : Intermediate (One to five years)

4. Program duration : Medium Term (One to five years)

5. Expending formula funds or state-matching funds : Yes

6. Expending other than formula funds or state-matching funds : Yes

V(B). Program Knowledge Area(s)

1. Program Knowledge Areas and Percentage

KA Code	Knowledge Area	%1862 Extension	%1890 Extension	%1862 Research	%1890 Research

610	Domestic Policy Analysis	0%		5%	
801	Individual and Family Resource Management	50%		0%	
	Total	100%		100%	

V(C). Planned Program (Situation and Scope)

1. Situation and priorities

The economy is always changing and as new problems arise, research programs are needed to focus on the efficiency of crop and livestock sectors, sustainability of the food and fiber system, and rural development.

Farmers and ranchers without an estate and transition plan could face challenges detrimental to the future of their agricultural operation. With the average age of farmers and ranchers in South Dakota over 55, it becomes more and more important that all generations involved in the operation understand estate and transition planning.

By the year 2050, producers will be charged with feeding nine billion people. With the changes to agriculture in the past years, and with rural America shrinking, new skills are needed for agricultural operations to remain viable and sustainable.

2. Scope of the Program

- In-State Extension
- In-State Research
- Multistate Extension

V(D). Planned Program (Assumptions and Goals)

1. Assumptions made for the Program

We Assume:

- By the year 2050, producers will be charged with feeding nine billion people
- Farmers and ranchers face estate and transition challenges
- Agricultural land values and rental rates have an economic impact South Dakota
- Value-added agriculture is important to South Dakota
- Volatility in energy markets is also transmitted directly into agricultural markets
- There is risk and uncertainty in future commodity price movements
- There are financial risks with the changing slaughter cattle market
- Product price and product quality matter to the consumer

2. Ultimate goal(s) of this Program

Goals:

- Assure the sustainability of family agricultural operations
- Increase landowner profits
- Generate agriculture information for policy makers and rural residents
- Study the implications of converging agriculture, energy, and environmental policies
- Increase profits for farmers, elevators, and food processors
- Reduce financial risks for cattle producers
- Increase cattle production by increasing the quality of beef products

V(E). Planned Program (Inputs)

1. Estimated Number of professional FTE/SYs to be budgeted for this Program

Year	Extension		Research	
	1862	1890	1862	1890
2014	4.6	0.0	13.4	0.0
2015	4.6	0.0	13.4	0.0
2016	4.6	0.0	13.4	0.0
2017	4.6	0.0	13.4	0.0
2018	4.6	0.0	13.4	0.0

V(F). Planned Program (Activity)

1. Activity for the Program

- Analyze Farm Real Estate Market Developments
- Analyze Agricultural Commodity Prices
- Research Trends and Financial Risks
- Develop Marketing Strategy Recommendations
- Conduct Estate and Transition Planning Conferences
- Partner with the South Dakota Soybean Research and Promotion Council
- Conduct Ag CEO Workshops

2. Type(s) of methods to be used to reach direct and indirect contacts

Extension

Direct Methods	Indirect Methods
<ul style="list-style-type: none"> • Education Class • Workshop 	<ul style="list-style-type: none"> • Newsletters • Web sites other than eXtension

3. Description of targeted audience

- Agricultural Commodity Groups
- Policy Makers
- Environmental Groups
- Farmers, Ranchers
- Producers
- Ag Land Owners
- Women in Agriculture
- Youth
- Agricultural Leaders

V(G). Planned Program (Outputs)

NIFA no longer requires you to report target numbers for standard output measures in the Plan of Work. However, all institutions will report actual numbers for standard output measures in the Annual Report of Accomplishments and Results. 3	Number of Participants in the Ag CEO Program

Outcome # 1

1. Outcome Target

Number of Economics, Markets, and Policy Hatch Research Projects

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 602 - Business Management, Finance, and Taxation
- 603 - Market Economics
- 604 - Marketing and Distribution Practices
- 605 - Natural Resource and Environmental Economics
- 607 - Consumer Economics
- 608 - Community Resource Planning and Development
- 609 - Economic Theory and Methods
- 610 - Domestic Policy Analysis
- 801 - Individual and Family Resource Management

4. Associated Institute Type(s)

- 1862 Research

Outcome # 2

1. Outcome Target

Number of Family Farms or Ranches that Participated in Estate and Transition Planning Conferences

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 801 - Individual and Family Resource Management

4. Associated Institute Type(s)

- 1862 Extension

Outcome # 3

1. Outcome Target

Number of Participants in the Ag CEO Program

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 602 - Business Management, Finance, and Taxation
- 603 - Market Economics
- 605 - Natural Resource and Environmental Economics
- 608 - Community Resource Planning and Development

4. Associated Institute Type(s)

- 1862 Extension

V(J). Planned Program (External Factors)

1. External Factors which may affect Outcomes

- Economy

Description

Funding cuts are expected to continue to impact South Dakota State University, especially filling vacant staff positions in SDSU Extension.

V(K). Planned Program - Planned Evaluation Studies

Description of Planned Evaluation Studies

Due to continued budget constraints, a full-time evaluator has not been hired. However, we are diligent in our efforts to teach staff how to collect and report meaningful, useful programming data. This includes establishing baseline data, templates that correspond to NIFA reporting, and writing impacts that show strong results.

V(A). Planned Program (Summary)

Program # 7

1. Name of the Planned Program

Human Nutrition, Food Safety, and Human Health and Well-Being

2. Brief summary about Planned Program

Activities in this Planned Program are driven SDSU Extension. The research activities in this program are supported by our partnership with College of Education and Human Sciences. Hatch funded projects include but are not limited to research involving nutrition and physical activity education, induction of the death of fat cells - apoptotic, the understanding of nutrient-gene interaction, enhanced beef consumption, determining the impact of dietary components, and assessing factors that influence eating behavior of young adults. Activities being reported for SDSU Extension include Food Safety Certification and Recertification, Home Food Preservation, Food Entrepreneurs, KidQuest, Healthy Aging, Tatanka's Healthy Tales, Senior Resource Fairs, International Bonds, and Smart Choices Grocery Store.

3. Program existence : Intermediate (One to five years)

4. Program duration : Medium Term (One to five years)

5. Expending formula funds or state-matching funds : Yes

6. Expending other than formula funds or state-matching funds : Yes

V(B). Program Knowledge Area(s)

1. Program Knowledge Areas and Percentage

KA Code	Knowledge Area	%1862 Extension	%1890 Extension	%1862 Research	%1890 Research
701	Nutrient Composition of Food	0%		5%	
702	Requirements and Function of Nutrients and Other Food Components	0%		30%	
703	Nutrition Education and Behavior	35%		43%	
704	Nutrition and Hunger in the Population	0%		6%	
712	Protect Food from Contamination by Pathogenic Microorganisms, Parasites, and Naturally Occurring Toxins	40%		7%	
723	Hazards to Human Health and Safety	0%		1%	
724	Healthy Lifestyle	25%		8%	
	Total	100%		100%	

V(C). Planned Program (Situation and Scope)

1. Situation and priorities

Obesity is a major concern within the United States and specifically within South Dakota. It is related to poor nutrition, the lack of physical activity and increased sedentary behavior. Obesity has been associated with increased risk for many chronic diseases. To improve individual's health, scientific discoveries need to be found and translated to practice.

SDSU Extension has seen an increase in requests for information on home food preservation. With the resurgence in gardening and more people that want to sell home processed foods, the demand for USDA Food Preservation Guidelines has increased significantly.

The marketing of home processed and home-baked foods has gained popularity in South Dakota. Farmers Markets are an excellent outlet for entrepreneurs to sell their products, but health rules and regulations must be followed closely to insure the safety of consumers.

Youngsters in the 5th and 6th grade typically do not have good health habits without some form of intervention. In South Dakota, 32.5% of youth age 5-19 are overweight or obese. Physical inactivity, poor nutrition, and obesity are major contributors to health problems and chronic diseases.

Middle-aged and older adults in rural communities do not always have the resources available to take responsibility for their own well-being. Community members often want to exercise but are not willing to pay fees to join a fitness center.

South Dakota American Indian children have higher than average health risks for obesity and diabetes. Adopting a healthy diet and active lifestyle can decrease the chances for these at-risk children to develop these diseases. Education at an early age, in a culturally sensitive way, and with repeated exposure encourages adoption of healthy practices.

Senior citizens often are not aware of the services available to them that assist in healthy living or services that help them continue to live independently.

Senior citizens need to be involved in their communities to help them maintain their well-being. The Intergenerational Bonds program focuses on building and strengthening bonds between children and senior citizens.

Grocery shoppers with limited resources need assistance in increasing their knowledge and skills in order to get the most value for their food dollar. Information on how to make healthy food choices and how to shop for value can improve a families? diet and therefore their health.

The Centers for Disease Control estimates that each year 48 million Americans get sick from foodborne diseases. In South Dakota, it is estimated that in 2011, 337 hospitalizations and eight deaths resulted from foodborne illness.

2. Scope of the Program

- In-State Extension
- In-State Research
- Multistate Research
- Multistate Extension
- Integrated Research and Extension

- Multistate Integrated Research and Extension

V(D). Planned Program (Assumptions and Goals)

1. Assumptions made for the Program

We Assume:

- Excessive weight gain increases the risk of developing serious diseases
- Apoptosis is emerging as a promising strategy for prevention and treatment of obesity
- Health is directly related to nutritional status
- The resurgence in gardening has increased the demand for home food preservation
- The growing popularity of Farmer's Markets has increased demand for information
- Dissemination of nutritional information will produce healthier eating habits
- Children and adults will become more physically active with awareness education
- Elderly people want to stay involved in their communities
- Underserved audiences lack knowledge and skills in grocery shopping
- The number of cases of foodborne illness can be reduced

2. Ultimate goal(s) of this Program

Goals:

- Change behavior patterns in young adults
- Increase the consumption of safe and nutritious food
- Decrease the number of overweight and obese people in South Dakota
- Keep aging citizens healthy and active in their communities
- Decrease the number of cases of foodborne illness
- Decrease serious diseases

V(E). Planned Program (Inputs)

1. Estimated Number of professional FTE/SYs to be budgeted for this Program

Year	Extension		Research	
	1862	1890	1862	1890
2014	11.7	0.0	3.7	0.0
2015	11.7	0.0	3.7	0.0
2016	11.7	0.0	3.7	0.0
2017	11.7	0.0	3.7	0.0
2018	11.7	0.0	3.7	0.0

V(F). Planned Program (Activity)

1. Activity for the Program

- Research that Focuses on Dietary Micronutrients
- Conduct Research for the Prevention and Treatment of Obesity
- Research to Understand Nutrient-gene Interactions
- Teach Food Safety Programs
- Distribute Fact Sheets to Food Pantries
- Develop Food Preservation Programs
- Conduct Home Food Preservation Workshops
- Conduct Local Food Entrepreneur Programs
- Develop Nutrition and Physical Activity Curriculum
- Train Teens as Teachers
- Collaborate with the University of Nebraska-Lincoln
- Conduct Workshops for the Aging and Senior Citizens

2. Type(s) of methods to be used to reach direct and indirect contacts

Extension

Direct Methods	Indirect Methods
<ul style="list-style-type: none"> • Education Class • Workshop • Group Discussion • One-on-One Intervention • Demonstrations 	<ul style="list-style-type: none"> • Newsletters • Web sites other than eXtension • Other 1 (Social Media)

3. Description of targeted audience

- Nutrition and Food scientists
- Health Educators
- Athletes
- Food Service Establishments and Employees
- Minority Audiences
- Food Pantries
- Food Entrepreneurs
- Consumers of Food Products
- Local Schools
- Youth
- Senior Citizens

V(G). Planned Program (Outputs)

NIFA no longer requires you to report target numbers for standard output measures in the Plan of Work. However, all institutions will report actual numbers for standard output measures in the Annual Report of Accomplishments and Results. The standard outputs for which you must continue to collect data are:

- Number of contacts
 - Direct Adult Contacts
 - Indirect Adult Contacts
 - Direct Youth Contacts
 - Indirect Youth Contact
- Number of patents submitted
- Number of peer reviewed publications

Clicking this box affirms you will continue to collect data on these items and report the data in the Annual Report of Accomplishments and Results.

V(H). State Defined Outputs

1. Output Measure

- Percentage of all Hatch Research Projects in Human Nutrition, Food Safety, and Human Health and Well-Being
- Number of Home Food Preservation Workshops
- Number of Food Entrepreneur Programs Conducted
- Number of Teens Trained as Teachers for KidQuest
- Number of Healthy Aging Presentations
- Number of Tatanka's Healthy Tales Activity Books Distributed
- Number of Senior Resource Fairs Presented
- Number of Intergenerational Bonds Presentations
- Number of Smart Choices Grocery Store Locations
- Number of Food Safety Certification or Recertification Courses Presented

Clicking this box affirms you will continue to collect data on these items and report the data in the Annual Report of Accomplishments and Results.

V(I). State Defined Outcome

O. No	Outcome Name
1	Number of Human Nutrition, Food Safety, and Human Health and Well-Being Hatch Research Projects
2	Number of Food Preservation Workshop Participants
3	Number of Food Entrepreneur Program Participants
4	Number of Schools that Completed the KidQuest Curriculum
5	Number of Healthy Aging Participants
6	Number of Children Reached through the Tatanka's Healthy Tales Activity Books
7	Number of Senior Resource Fairs Participants
8	Number of Intergenerational Bonds Participants
9	Number of Smart Choices Grocery Store Participants
10	Number of Participants that Completed a Food Safety Course

Outcome # 1

1. Outcome Target

Number of Human Nutrition, Food Safety, and Human Health and Well-Being Hatch Research Projects

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 701 - Nutrient Composition of Food
- 702 - Requirements and Function of Nutrients and Other Food Components
- 703 - Nutrition Education and Behavior
- 704 - Nutrition and Hunger in the Population
- 712 - Protect Food from Contamination by Pathogenic Microorganisms, Parasites, and Naturally Occurring Toxins
- 723 - Hazards to Human Health and Safety
- 724 - Healthy Lifestyle

4. Associated Institute Type(s)

- 1862 Research

Outcome # 2

1. Outcome Target

Number of Food Preservation Workshop Participants

2. Outcome Type : Change in Action Outcome Measure

3. Associated Knowledge Area(s)

- 712 - Protect Food from Contamination by Pathogenic Microorganisms, Parasites, and Naturally Occurring Toxins

4. Associated Institute Type(s)

- 1862 Extension

Outcome # 3

1. Outcome Target

Number of Food Entrepreneur Program Participants

2. Outcome Type : Change in Action Outcome Measure

3. Associated Knowledge Area(s)

- 712 - Protect Food from Contamination by Pathogenic Microorganisms, Parasites, and Naturally Occurring Toxins

4. Associated Institute Type(s)

- 1862 Extension

Outcome # 4

1. Outcome Target

Number of Schools that Completed the KidQuest Curriculum

2. Outcome Type : Change in Action Outcome Measure

3. Associated Knowledge Area(s)

- 703 - Nutrition Education and Behavior
- 724 - Healthy Lifestyle

4. Associated Institute Type(s)

- 1862 Extension
- 1862 Research

Outcome # 5

1. Outcome Target

Number of Healthy Aging Participants

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 724 - Healthy Lifestyle

4. Associated Institute Type(s)

- 1862 Extension

Outcome # 6

1. Outcome Target

Number of Children Reached through the Tatanka's Healthy Tales Activity Books

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 703 - Nutrition Education and Behavior
- 724 - Healthy Lifestyle

4. Associated Institute Type(s)

- 1862 Extension

Outcome # 7

1. Outcome Target

Number of Senior Resource Fairs Participants

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 703 - Nutrition Education and Behavior
- 724 - Healthy Lifestyle

4. Associated Institute Type(s)

- 1862 Extension

Outcome # 8

1. Outcome Target

Number of Intergenerational Bonds Participants

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 703 - Nutrition Education and Behavior
- 724 - Healthy Lifestyle

4. Associated Institute Type(s)

- 1862 Extension

Outcome # 9

1. Outcome Target

Number of Smart Choices Grocery Store Participants

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 724 - Healthy Lifestyle

4. Associated Institute Type(s)

- 1862 Extension

Outcome # 10

1. Outcome Target

Number of Participants that Completed a Food Safety Course

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 712 - Protect Food from Contamination by Pathogenic Microorganisms, Parasites, and Naturally Occurring Toxins

4. Associated Institute Type(s)

- 1862 Extension

V(J). Planned Program (External Factors)

1. External Factors which may affect Outcomes

- Economy

Description

Funding cuts are expected to continue to impact South Dakota State University, especially filling vacant staff positions in SDSU Extension.

V(K). Planned Program - Planned Evaluation Studies

Description of Planned Evaluation Studies

Due to continued budget constraints, a full-time evaluator has not been hired. However, we are diligent in our efforts to teach staff how to collect and report meaningful, useful programming data. This includes establishing baseline data, templates that correspond to NIFA reporting, and writing impacts that show strong results.

V(A). Planned Program (Summary)

Program # 8

1. Name of the Planned Program

Families, Youth and Communities

2. Brief summary about Planned Program

Activities in this Planned Program are driven SDSU Extension, with little activity by research. The research activities in this program are supported by our partnership with College of Education and Human Sciences. Hatch funded projects include but are not limited to research involving financial literacy and management behavior, physical and mental health in diverse rural low-income families, and psychological and socio-cultural factors that impact the decision to save. Activities being reported for SDSU Extension include The Great American Book Read, Small Business Beginnings, FCCLA Leadership, Strong Bodies, Strong Futures, Teens as Teachers, Lakota Beginning Farmer and Rancher Development, Character Counts, and Garden Development or Enhancement.

3. Program existence : Intermediate (One to five years)

4. Program duration : Medium Term (One to five years)

5. Expending formula funds or state-matching funds : Yes

6. Expending other than formula funds or state-matching funds : Yes

V(B). Program Knowledge Area(s)

1. Program Knowledge Areas and Percentage

KA Code	Knowledge Area	%1862 Extension	%1890 Extension	%1862 Research	%1890 Research
215	Biological Control of Pests Affecting Plants	1%		0%	
216	Integrated Pest Management Systems	2%		0%	
315	Animal Welfare/Well-Being and Protection	2%		0%	
704	Nutrition and Hunger in the Population	5%		0%	
801	Individual and Family Resource Management	0%		59%	
802	Human Development and Family Well-Being	0%		16%	
803	Sociological and Technological Change Affecting Individuals, Families, and Communities	35%		6%	
805	Community Institutions, Health, and Social Services	0%		19%	
806	Youth Development	55%		0%	
	Total	100%		100%	

V(C). Planned Program (Situation and Scope)

1. Situation and priorities

There are concerns that the savings rate of American households, especially low and moderate income households is inadequate, leaving families extremely vulnerable to economic setbacks. Additionally, research indicates that there is a link between financial security and over-all health. Unhealthy families are not able to fully socially and economically contribute to their communities.

Many small communities in South Dakota do not realize that they are spending more educational funding on the best and the brightest high school students that graduate and leave their communities, while spending less on the graduates that stay.

Small businesses represent approximately 60% of all jobs nationally and are a large part of South Dakota's economy. Small businesses need educational resources, but often times it is not easily accessible.

Teenagers have the potential to become great leaders for their families, careers or communities, but need to be exposed to activities that teach them skills.

In South Dakota, 33.6% of youth ages 5-19 are overweight or obese. More than 85% do not eat enough fruits and vegetables and most are not physically active, with 23% of the youth watching 3 or more hours of television on an average school day.

Poverty on the reservation has long been a major problem. Much of the land on South Dakota Indian Reservations is operated by non-Native American producers or is not being sustainably utilized at all. Few Native American beginning farmers/ranchers have adequate financial resources to invest in further education beyond local attendance at short courses.

With 82% of parents in South Dakota working, children are less supervised and parents often lack the tools or the time to teach character development. Today's youth are continually exposed to negative role models and high risk behaviors, leading to higher incidences of bad decision making.

As rural America keeps shrinking, there is a greater disconnect between our citizens and agriculture. At the same time, more people are in need of affordable, safe, and healthy foods. Research indicates that community gardeners, as well as youth that participate in gardening programs, include more fruits and vegetables in their diet.

2. Scope of the Program

- In-State Extension
- In-State Research
- Multistate Research
- Multistate Extension
- Integrated Research and Extension
- Multistate Integrated Research and Extension

V(D). Planned Program (Assumptions and Goals)

1. Assumptions made for the Program

We Assume:

- Mental and physical health and economic status affect quality of life for rural families
- Low and moderate income families have inadequate savings
- Rural communities need educated citizens for sustainability and growth
- Small businesses will continue to employ a high percentage of South Dakotans
- Teenagers will reach their full potential if exposed to the right skills
- Younger children look up to teenagers and learn well from them
- Native Americans want out of poverty
- Youth make poorer decisions when less supervised
- Rural America is shrinking

2. Ultimate goal(s) of this Program

Goals:

- Improve and strengthen the vitality and sustainability of rural communities
- Create jobs and reduce unemployment
- Reverse the shrinking of rural America
- Create young leaders for future needs
- Create robust learning environments for youth
- Decrease the number of overweight and obese youth in South Dakota
- Increase healthy eating behaviors in our youth
- Increase the number of Native American farmers and ranchers
- Develop lasting, good character in our youth
- Reverse the disconnect between our citizens and agriculture

V(E). Planned Program (Inputs)

1. Estimated Number of professional FTE/SYs to be budgeted for this Program

Year	Extension		Research	
	1862	1890	1862	1890
2014	26.2	0.0	0.6	0.0
2015	26.2	0.0	0.6	0.0
2016	26.2	0.0	0.6	0.0
2017	26.2	0.0	0.6	0.0
2018	26.2	0.0	0.6	0.0

V(F). Planned Program (Activity)

1. Activity for the Program

- Research that Examines Financial Savings Behavior
- Research to Understand Mental and Physical Health and Economics in Rural America
- Conduct Community Book Read and Discussions
- Conduct Small Business Workshops
- Conduct Leadership Workshops
- Deliver Healthy Living Program
- Conduct Workshops on Indian Reservations in Western South Dakota
- Conduct Character Education Program Training
- Develop and Enhance Community and School Gardens
- Partner with Ground Works School Teaching Gardens

2. Type(s) of methods to be used to reach direct and indirect contacts

Extension

Direct Methods	Indirect Methods
<ul style="list-style-type: none"> • Education Class • Workshop • Group Discussion • One-on-One Intervention • Demonstrations 	<ul style="list-style-type: none"> • Newsletters • Web sites other than eXtension • Other 1 (social media)

3. Description of targeted audience

- Low to Moderate Income Families
- Mothers Living in Rural Areas
- Rural Communities
- Entrepreneurs
- Youth
- Teenagers
- Native Americans
- Consumers of Food Products
- Local Schools
- Youth Program Leaders

V(G). Planned Program (Outputs)

NIFA no longer requires you to report target numbers for standard output measures in the Plan of Work. However, all institutions will report actual numbers for standard output measures in the Annual Report of Accomplishments and Results. The standard outputs for which you must continue to collect data are:

- Number of contacts
 - Direct Adult Contacts
 - Indirect Adult Contacts
 - Direct Youth Contacts
 - Indirect Youth Contact
- Number of patents submitted
- Number of peer reviewed publications

Clicking this box affirms you will continue to collect data on these items and report the data in the Annual Report of Accomplishments and Results.

V(H). State Defined Outputs

1. Output Measure

- Percentage of all Hatch Research Projects in Families, Youth and Communities
- Number of Communities Participating in the Book Read and Discussions
- Number of Communities Hosting Small Business Beginnings Workshops
- Number of FCCLA Leadership Workshops Conducted
- Number of Teens Trained in the Strong Bodies, Strong Futures, Teens as Teachers Program
- Conduct Horticulture and Agriculture Workshops
- Number of Character Counts School Trainings
- Number of Garden Development or Enhancement Workshops and Webinars Conducted

Clicking this box affirms you will continue to collect data on these items and report the data in the Annual Report of Accomplishments and Results.

V(I). State Defined Outcome

O. No	Outcome Name
1	Number of Families, Youth and Communities Hatch Research Projects
2	Number of Participants in the Book Reads and Discussions
3	Number of Small Business Beginnings Workshop Participants
4	Number of FCCLA Leadership Workshop Participants
5	Number of Students Taught by Strong Bodies, Strong Futures, Teens as Teachers
6	Number of Participants Graduating from Lakota Beginning Farmer and Rancher Development Program
7	Number of Teachers Trained to Use Character Counts
8	Number of Community or School Gardens Receiving Assistance with Development or Enhancement

Outcome # 1

1. Outcome Target

Number of Families, Youth and Communities Hatch Research Projects

2. Outcome Type : Change in Knowledge Outcome Measure

3. Associated Knowledge Area(s)

- 801 - Individual and Family Resource Management
- 802 - Human Development and Family Well-Being
- 803 - Sociological and Technological Change Affecting Individuals, Families, and Communities
- 805 - Community Institutions, Health, and Social Services

4. Associated Institute Type(s)
